

Speak your language. They hear theirs.

LIVE VOICE TRANSLATION ON EVERY CALL

MPower Space is an international calling and messaging app. Talk in your own language and let the other person hear theirs, spoken aloud, across 57 languages.

Free between users · 57 languages

01 — OVERVIEW

One app for calls, chat, and being understood.

Voice and video calls, messaging, media and stories between MPower users are free, anywhere in the world. When you dial an ordinary landline or mobile, you pay by the minute from a prepaid balance in US dollars — and the app shows the cost before it connects. On any call, live voice translation lets each side speak their own language and hear the other in theirs. The platform runs on our own infrastructure.

57

Languages

Live translation, on the call

Free

Between users

Calls, video, chat, media & stories

2

Platforms

iPhone and Android, plus web

Global

By design

Built for people across borders

Who it is for

For families apart, migrant workers, cross-border teams and anyone who lives and works across languages.

02 — LIVE TRANSLATION

How the call translates itself, as you talk.

You speak normally. At the end of each sentence your words are translated and spoken aloud to the other person in their language — and their reply comes back in yours, across 57 languages.

1

You speak

Talk naturally in your own language, one complete thought at a time.

2

MPower translates

At the end of each sentence the whole thought is translated — not word by word — so meaning and tone survive.

3

They hear their language

Your words are spoken aloud to the other side in theirs; their reply returns spoken in yours.

M Detected automatically

Between two MPower users, each side's language is known — nobody sets anything. You both just speak.

M Chosen as you dial

Calling an ordinary number? You pick the language the other side speaks before the call connects.

A natural one-to-two-second pause lets meaning assemble correctly — the same beat a skilled interpreter takes. Live translation is an aid to understanding, not a certified interpretation service.

03 — WHAT IT DOES

Everything, in one place.

M Live Call Translation

Speak normally; after each sentence your words are spoken to the other side in their language, and their reply comes back in yours — 57 languages, on app calls and calls to ordinary numbers.

M Free Voice & Video Calls

Clear HD voice and video calls between MPower users, anywhere in the world, at no cost.

M Messaging With Everything

Text, photos, videos, files, voice notes and live location. Lock private chats with a PIN, archive or delete them.

M Stories

Share a moment for 24 hours and see exactly who viewed it.

M International Calling

Dial any landline or mobile worldwide, billed per started minute from a prepaid USD balance. The cost is shown before you connect.

M Your Number Is Your Identity

Verify the number you already have; others see you by it, and it shows as your caller ID on outbound calls.

04 — MPOWER FOR BUSINESS

Your company's phone system. Inside the app.

Turn MPower Space into a complete cloud phone system — no hardware, no PBX box, no wiring. Add your team, greet callers with an AI menu, and route every call to the right place.

3900

Answering menu

Dial to build the AI menu that greets and routes your callers.

3990

Conference room

Dial to drop your whole team into one standing room — no link to send.

Built for

Distributed teams

Support lines

Sales desks

Growing companies

Everything below is part of the free app. Your company pays only for the minutes your team spends calling ordinary phone numbers — from a prepaid balance in US dollars.

05 — THE PHONE SYSTEM

Every part of it, explained.

01 Internal Extensions

Add teammates to a shared workspace and give each a short internal number, so anyone in the company can reach anyone else with a couple of digits.

02 AI Answering Menu — dial 3900

Type your greeting and options in plain text; a natural AI voice reads them to callers and routes each one to the right person or department by the key they press.

03 Conference Room — dial 3990

Everyone who dials 3990 lands in the same room — ideal for a standing daily call, with no link to create or send each morning.

04 Call Forwarding

Send calls to another extension, a mobile, or an outside number, so a call to the company always reaches whoever is on duty.

05 Answer & Transfer Anywhere

Pick up company calls on your mobile or in the web console, and transfer them to any teammate mid-call — full desk-phone control, wherever you are.

06 — HOW TO SET IT UP

Your workspace, live in four steps.

No installation, no engineer, no hardware. You can have a working company phone system the same afternoon.

1

Create your workspace

Open a company account in the app in a few taps — you become its first admin.

2

Add your team

Invite teammates by number; each one receives a private internal extension automatically.

3

Build your answering menu

Dial 3900, type the greeting and the options; a natural AI voice reads them to every caller.

4

Route every call

Set call forwarding and open your conference room on 3990, so calls always land in the right place.

07 — SECURITY & TRUST

Private by design. Honest about how.

M Encrypted in transit

Calls and messages are encrypted in transit. This is transport encryption — not end-to-end encryption — and we describe it exactly as it is.

M Encrypted at rest

Messages and stories are encrypted at rest on our servers.

M Your own infrastructure

The platform runs on our own servers, not a shared consumer cloud, so your communications stay on infrastructure we control.

M You stay in control

A two-step verification PIN, chat lock, a block list and story privacy put you in charge of who reaches you and who sees what.

08 — PRICING

Free app. Pay only when you dial an ordinary number.

Always free

- The app itself, on iPhone & Android
- Voice & video calls between users
- Messaging, media, voice notes, location
- Stories with seen-by
- Live voice translation, 57 languages

Pay per minute

- Calls to ordinary phone numbers
- Billed per started minute
- From a prepaid balance in US dollars
- Cost shown before you connect
- No subscription for the app

Rates depend on the destination. Before every call the app tells you whether the number is on MPower (free) or on the telephone network (charged per minute), and shows your balance.

GET STARTED

Start free today.

1

Download the app

Get MPower Space free on iPhone or Android from mpowerspace.ai.

2

Verify your number

Confirm the number you already use — it becomes your identity on MPower.

3

Start calling

Call and message other users for free, with live translation on every call.

Talk in any language.
